**THE REVOLUTIONARY  
SKIP TRANSPORT SYSTEM**

## Introduction

Skiptracks was founded by Ray Lawless to address the difficulty experienced by contractors transporting skips and construction materials to and from confined sites with restricted access, such as narrow laneways, multi-storey car parks, city centre locations, uneven and sloped terrain.

Manufactured in Ireland by partner company Keltec Engineering, the Skiptracks STK6 Trackmate is an innovator in skip mobility. The machine operates on rubber tracks and is easily navigated via remote control.

The results have shown the STK6 Trackmate to be a time saving, cost effective and eco-friendly solution.

To view the STK6 Trackmate in action view our videos here

## Machine Specifications & Features

- Dimensions: 2x2x4 meters long.
- Safe Working Load (SWL) 6 tonnes.
- Powered by a 35KW Kubota engine.
- Bosch Rexroth hydraulics and state of the art remote control system.
- The machine is available with a diesel or electric motor.
- Operates at 360 degrees.
- The STK6 Trackmate is fully CE compliant and manufactured to the highest quality standards.
- Site ready with a fully compliant health and safety program.
- The STK6 Trackmate is a versatile machine. The telescopic skip loader is detachable from the main tractor unit which allows us to customise attachments e.g. mini-crane.

## Benefits

- Reduce your labour costs.
- Reduce your program time.
- Easy to operate.
- Transport multiple skips to site and avoid extended turnaround times.
- Eliminate double handling.
- With its low centre of gravity this makes the machine ideal for uneven and sloped terrain.
- Store skips on-site rather than on public footpaths, roads etc.
- Is your skip delivery partner unable to access your site to deliver skips? With the STK6 Trackmate you can easily access narrow laneways, underground car parks, sports stadiums and mews buildings.

## What Our Customers Say

“ Skiptracks provided us with a safe and efficient solution for a site with restricted access that busy city centre locations can sometimes present. The STK6 Trackmate by Skiptracks exceeded our expectations and we will use it on future projects and are happy to recommend it ”

**Mick Flynn** *MCIQB | Operations Director | Flynn Management & Contractors*

---

“ Many of our projects are based in Dublin city and the STK6 Trackmate has provided us with the perfect solution in accessing sites with restricted access and transporting multiple skips and materials to site in a safe, efficient and cost effective manner. It has been invaluable to us in maintaining tight program times and the STK6 Trackmate will be an integral part of future Nspace projects ”

**Gareth Nihill** *Director | Nspace Ltd*

---

“ Without the use of the STK6 Trackmate we would have been left with no option but to coordinate deliveries and waste disposal after hours along with engaging additional labour, resulting in additional costs and prolonged duration of the project ”

**Alan McEntee** *B. tech (cons tec) B. Surv | Contracts Manager | D & T Forkan ltd*

---

“ The machine has solved logistical problems for our clients onsite which in turn has saved them money and in many cases the Skiptrack STK6 Trackmate has knocked considerable time from the agreed completion dates ”

**Rory O'Connor** *Managing Director | Hire2K*
